Córdoba, Argentina

ABOUT ME

Systems Engineering student with a passion for innovation and solving technological problems. My approach not only encompasses programming and systems design, but also creating meaningful solutions. I value collaboration, adaptability and constant improvement. I seek to contribute to challenging projects where long-term vision and innovation are fundamental.

WORK EXPERIENCE

Full Stack Developer

Reputación Digital. | August 2023 - Present

Experience developing a full stack web application, using Svelte for the frontend and Python for the backend. The application focused on extracting data from Elasticsearch and presenting it using graphs and tables. I implemented a microservices architecture, allowing efficient communication between the frontend and backend through APIs.

Additionally I did:

- User login / registration
- Implementation with the Stripe payment platform
- Use of graphics libraries such as Echarts
- Report in PDF form using jsPDF

Full Stack Developer

Be More | May 2023 - August 2023

Provide support to websites developed with PHP and MySQL.
Manage CPanel settings.

ACADEMIC DATA

Information systems engineering

Universidad Tecnológica Nacional | 2020 - Present

React Frontend Developer

CoderHouse | 2021 - 2022

LANGUAGES

Spanish:
Native.

English:
Intermediate.

MORE INFORMATION

- Use the object-oriented paradigm
- Use design patterns
- Knowledge of the Java language. I have a project in which I built a gateway with jwt authentication (Spring Boot).
- Experience using Scrum
